L2 ANSWER 1 OF 6 USPATFULL on STN
AB The invention relates to a cosmetic treatment process for improving the
epidermal barrier function of the skin, scalp and mucous membrane,
characterized in that a preparation containing at least one substance
which modulates tight junctions and/or which modulates occludin and/or
claudins and/or which modulates the **Zona occludens**
through the proteins ZO-1, ZO-2
and/or ZO-3 is topically applied. The present
invention also relates to the use of a substance which modulates tight
junctions and/or which modulates occludin and/or claudins and/or which
modulates the **Zona occludens** through the proteins
ZO-1, ZO-2 and/or ZO-
3 for the production of cosmetic preparations for improving the
epidermal barrier function of the skin, scalp and mucous membrane, to
the use of this substance for the production of cosmetic preparations
for protection against aging of the skin and to the use of the substance
for the production of cosmetic preparations for protection against the
harmful effects of environmental toxins and UV radiation.

AB This invention relates to new members of the human Claudin polypeptide
family, to methods of making such polypeptides, and to methods of using
them to treat Claudin-associated conditions and to identify compounds
that alter Claudin polypeptide activities.

L2 ANSWER 4 OF 6 USPATFULL on STN

AB Methods for modulating immune cell signaling are provided. In general such methods involve modulating an interaction between a PDZ protein and a PDZ ligand protein whose interaction affects the composition and/or distribution of lipid rafts in an immune cell. Modulators that enhance or inhibit such interactions are also disclosed, as well as methods of screening for such modulators.

L2 ANSWER 5 OF 6 WPIDS COPYRIGHT 2004 THE THOMSON CORP on STN
AB EP 1384469 A UPAB: 20040316
NOVELTY - Cosmetic treatment to improve the epidermal barrier function of the skin, scalp and mucosa comprises **topical** application of a composition containing a substance (I) capable of modulating tight junctions or modulating occludin and/or claudins or modulating the **zona occludens** via protein ZO-1, ZO-2 and/or ZO-3.
DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for:
(1) use of (I) to prepare cosmetic agents for protecting the skin against aging or for protecting the skin, scalp and mucosa against toxic environmental influences or the effect of UV light;
(2) cosmetic compositions comprising at least one substance (I) and UV photoprotection factors and/or **antioxidants**.
USE - To improve the epidermal barrier function of the skin, scalp and mucosa (no data given).
